# SEQUENTIAL INTERCEPT MODEL MAPPING REPORT FOR FRANKLIN COUNTY, PA

Final Report  
September 2025

Kathleen Kemp, Ph.D.

Christy Giallella, Ph.D.

Policy Research Associates

## ACKNOWLEDGMENTS

This report was prepared by Kathleen Kemp, Ph.D. and Christy Giallella, Ph.D. of Policy Research Associates, Inc. (PRA). PRA thanks Franklin County Criminal Justice Advisory Board for supporting this event and to the Franklin County Judicial Center for hosting this event. PRA also thanks President Judge Meyers for opening the workshop on September 11, 2025.

## OPENING REMARKS

President Judge Meyers welcomed participants to the Franklin County SIM workshop. His remarks emphasized the purpose of re-evaluating the community's Sequential Intercept Model (SIM) mapping and the value of cross-system collaboration. A moment of silence was held in remembrance of 9/11 and acknowledgment of recent tragic events in Charlotte. Judge Meyers underscored the goal of diverting individuals into treatment whenever safely possible, noting that gaps in community resources often compel the criminal justice system to use its own tools to ensure safety. His remarks highlighted the importance of balancing community safety with humane, treatment-oriented approaches and maintaining credibility through coordinated, responsible action.

Appendix C: Community Self-Assessment Survey Results.....	67

## INTRODUCTION

**S**ince 1995, Policy Research Associates have worked to expand community-based services and reduce justice involvement for adults with mental and substance use disorders in the criminal justice system. PRA is supported by the Substance Abuse and Mental Health Services Administration to focus on five areas:

- Criminal justice and behavioral health systems change
- Criminal justice and behavioral health services and support
- Trauma-informed care
- Peer support and leadership development
- Courts and judicial leadership

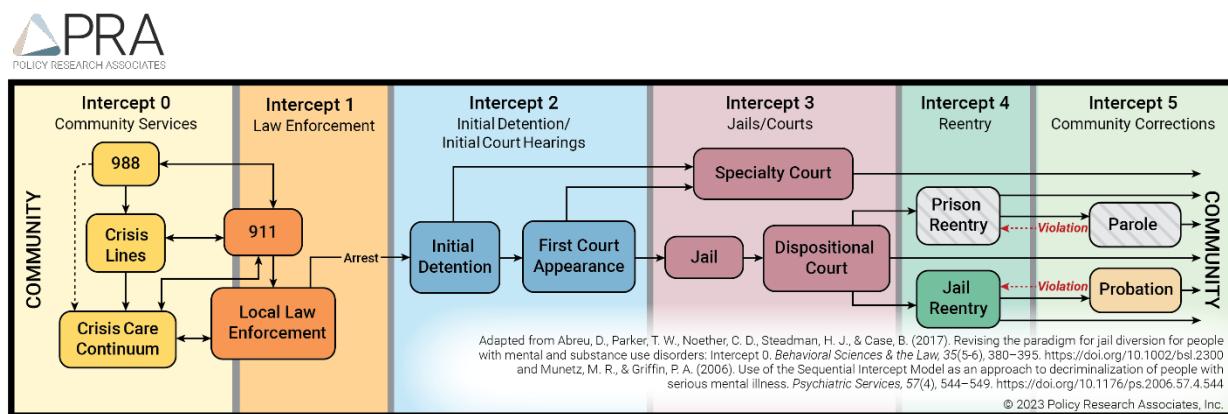

# BACKGROUND

The Sequential Intercept Model, developed by Mark R. Munetz, M.D. and Patricia A. Griffin, Ph.D.,<sup>1</sup> has been used as a focal point for states and communities to assess available opportunities, determine gaps in services, and plan for community change. These activities are best accomplished by a team of stakeholders that cross over multiple systems, including mental health, substance use, law enforcement, pretrial services, courts, jails, community corrections, housing, health, social services, peers, family members, and many others.

A Sequential Intercept Mapping is a workshop to develop a map that illustrates how people with behavioral health needs come in contact with and flow through the criminal justice system. Through the workshop, facilitators and participants identify opportunities for linkage to services and for prevention of further penetration into the criminal justice system.

The Sequential Intercept Mapping workshop has three primary objectives:

1. Development of a comprehensive picture of how people with mental illness and co-occurring disorders flow through the criminal justice system along six distinct intercept points: (0) Mobile Crisis Outreach Teams/Co-Response, (1) Law Enforcement and Emergency Services, (2) Initial Detention and Initial Court Hearings, (3) Jails and Courts, (4) Reentry, and (5) Community Corrections/Community Support
2. Identification of gaps and opportunities at each intercept for individuals in the target population
3. Development of priorities for activities designed to improve system and service level responses for individuals in the target population

The following report includes the results from an annual Sequential Intercept Model (SIM) session conducted by the Behavioral Health subcommittee of the Franklin County Criminal Justice Advisory Board. Franklin County's original intercept model and report was the product of an April 2009 National GAINS Center *ACTION: Cross-Systems Mapping and Taking Action for Change* workshop sponsored by

<sup>1</sup> Munetz, M., & Griffin, P. (2006). A systemic approach to the de-criminalization of people with serious mental illness: The Sequential Intercept Model. *Psychiatric Services*, 57, 544-549.

the Franklin County Commissioners and the Criminal Justice Advisory Board (CJAB). The Pennsylvania Commission on Crime and Delinquency funded both the 2009 and 2012 workshops and reports.

Our model is a work in progress: thanks to the efforts of many community stakeholders, we have added programs as they are available to address the gaps identified in the SIM sessions. In addition, to make the model even more of a robust planning tool, in 2012 we added information to assist in identifying resources and gaps for individuals with substance use disorders. In 2017, we incorporated the latest research on SIM development by adding an Intercept '0' to our model. Finally, in 2022, we incorporated information and resources from the County's new Community Connections Division, which also encompasses reentry services.

## OPPORTUNITIES AND GAPS AT EACH INTERCEPT

The centerpiece of the workshop is the development of a Sequential Intercept Model map. As part of the mapping activity, the facilitators work with the workshop participants to identify opportunities and gaps at each intercept. This process is important since the criminal justice system and behavioral health services are ever-changing, and the opportunities and gaps provide contextual information for understanding the local map. Moreover, this catalog can be used by planners to establish greater opportunities for improving public safety and public health outcomes for people with mental and substance use disorders by addressing the gaps and building on existing opportunities.

*Note: the resources included in this report and map reflect the conversation and participants present during the Sequential Intercept Model (SIM) Mapping Workshop. They may not be exhaustive of all relevant resources, programs, or organizations in the mapped community. For any additional resources to share, please send them to [cjab@franklincountypa.gov](mailto:cjab@franklincountypa.gov).*

Anyone in crisis can connect virtually and receive 24/7 crisis support with a trained crisis counselor. <a href="#">View metrics</a> from over 5.6 million conversations since 8/2013 and learn more about who, what, and when people connect for help.	

**National Helpline (SAMHSA 24/7)****Call:** 800-662-HELP (4357) **Visit:** [Website](#)

Also known as the Treatment Referral Routing Service (TRRS), this National Helpline is a confidential, 24/7 information service, in English and Spanish, for individuals and family members facing mental, substance use, or co-occurring disorders. Provides referrals to local treatment facilities, support groups, and community-based organizations.

**Veteran's Crisis Text Line****Call:** 800-273-TALK (8255) **Text:** 838255**Visit:** [Website](#)

24/7 National helpline by phone or SMS-text for any veteran, without needing to be enrolled in VA benefits or health care systems.

**Lawyers Concerned for Lawyers 24/7****Call:** 866-525-6466 **Visit:** [Website](#)**Judges Concerned for Judges 24/7****Call:** 800-219-6474 **Visit:** [Website](#)

Confidential help lines for lawyers and judges and their immediate families to speak with peer-attorneys and peer-judges from around the nation. Talk about any issues that cause stress or distress. Services include crisis response, intervention, short-term counseling, peer support, referrals to appropriate professionals and programs, and educational programming.

**State Employee Assistance Program (SEAP) – 24/7****Call:** 800-692-7459 **Visit:** [Website](#)

A free assessment and referral service for commonwealth employees and family members to help resolve personal issues or challenges.

**Crisis Lines (cont.)**

- PA Get Help Now is the primary statewide resource line and is consistently promoted across the Single County Authority (SCA) websites, county materials, prevention campaigns, and Pennsylvania Department of Drug and Alcohol Programs (DDAP) publications.

**9-1-1/Dispatch**

- 9-1-1 services are provided by the Department of Emergency Services [Emergency Communications](#) unit, which fields all calls and dispatch services for 21 fire departments, 16 EMS departments, and six (6) full-time police departments.
  - Municipalities in Franklin County without law enforcement services are covered by the Pennsylvania State Police (PSP), [Troop H Chambersburg Barracks](#).
  - 9-1-1 follows standard protocol when calls have a mental health component, such as a person in crisis, expressing suicidal ideation, or displaying unusual behavior. Call takers and dispatchers are trained to triage and identify the nature and urgency of the crisis, and dispatch appropriate services. Call takers must use a mandatory script that prevents them from proceeding to the next screen until answers are documented.
  - 9-1-1 staff receive specialized training through the [International Academy Emergency Dispatch](#) (IAED) association.
    - The new IAED [Protocol 41](#), officially named 'Caller in Crisis (1st Party Only)', provides guidance to dispatchers when handling calls involving individuals

experiencing a behavioral health or mental health crisis, especially when the caller is the person in crisis or 'first-party'.

- Once staff are trained, the protocol is consistently utilized.
- Several staff have received [Crisis Intervention Team \(CIT\)](#) 40-hour training and certification. Others have taken the CIT training for call takers, but the department prefers the 40-hour program. The department's goal is to ensure that 100% of the 9-1-1 team is CIT-trained.
- 9-1-1 calls can be transferred to Keystone Health Crisis Hotline; patched through with warm hand-off. Once the connection is made, 9-1-1 call takers can excuse themselves from the line.
- 9-1-1 Dispatch decisions, policy options are: police, fire, or medical – depending on service level needed.

#### **9-8-8**

- Keystone Health is the contracted provider funded by the state to answer 9-8-8 calls and employs 9-8-8-specific call takers.
- 9-8-8 can transfer calls to 9-1-1.
- 9-8-8 calls are directed to a different Keystone Health exchange call center during certain hours (hours were not available at the time of the workshop).

#### **Healthcare**

- The [WellSpan Chambersburg Hospital](#) provides medical, medical emergency, and psychiatric emergency services for county residents. Waynesboro Hospital provides medical and mental health emergency services.
  - Law enforcement typically transports individuals to Chambersburg Hospital, as well as Waynesboro.
- The [WellSpan Waynesboro Hospital](#) provides a 24/7 emergency department and medical services, but not emergency psychiatric services.
  - When individuals in behavioral health crisis present at the Emergency Department, staff will contact their WellSpan Chambersburg Hospital psychiatric unit for consultation.
- The Chambersburg [WellSpan Behavioral Health](#) satellite location (Catherine Street) provides general behavioral health care services on weekdays until 7:00 p.m.
- Veterans and their families needing medical and behavioral health care services have options outside of Franklin County to receive services, including:
  - The Pennsylvania [James E. Van Zandt Veterans Administration Medical Center](#), located in Altoona, is about 90 minutes from Chambersburg.
  - The [Hagerstown VA Clinic](#) in Maryland is located about 40 minutes from Chambersburg.
  - The [Martinsburg VA Medical Center](#) in West Virginia is located about one hour from Chambersburg.
  - [rabbittransit](#) transportation offers multiple alternatives to county Veterans and other residents, including:
    - The [rabbittransit Franklin Veterans Transportation](#) serves area Veterans with a shared ride service on Wednesdays from Chambersburg and Greencastle to the Hagerstown VA Clinic and Martinsburg VA Hospital under contract with the VA

- at no cost to the Veteran. Their [program flyer](#) provides pickup and return locations and times.
- The rabbittransit [Stop Hopper](#) service is an on-demand ride to and from any location within their Chambersburg and Fayetteville-area [service boundaries](#). Rides must be scheduled through a mobile phone application.
- The [Paratransit](#) service is a pre-arranged shared-ride service grouping people together between each other's origins and destinations, and must be arranged by application.
- [Danny's Ride](#) is a transportation service that provides individuals in recovery with an alternative means to make their treatment appointments.
- The Pyramid Health Care [Chambersburg Outpatient Treatment Center](#) offers walk-in alcohol and other drug screening and assessments on Monday, Tuesday, and Thursday between 11:00 a.m. and 3:00 p.m.
- Chambersburg [Comprehensive Treatment Center](#) (CTC) provides MAT treatment services for adults 18 years and older experiencing opioid addiction.
- [Keystone Health](#) is Franklin County's sole [Federally Qualified Health Center](#) (FQHC) provider and offers primary care services to residents regardless of their ability to pay or insurance status.
- Key Franklin County departments oversee behavioral health services provided in the county, including:

### **Franklin/Fulton Mental Health/Intellectual & Developmental Disabilities/Early Intervention**

- Mental Health (MH) provides oversight to the mental health service system for Franklin and Fulton county adults with severe and persistent mental illness and children who have a mental health diagnosis or who are at risk of developing a mental illness.
- Intellectual & Developmental Disabilities (IDD) supports Franklin/Fulton residents with developmental disabilities and their families to achieve greater independence, choice, and opportunity in their lives. The office seeks to improve an effective system of accessible services continuously and supports that are flexible, innovative, and person-centered.
- Early Intervention (EI) joins with The Pennsylvania Office of Child Development & Early Learning and families in providing this program to children ages birth to three (3) years old who have, or who are at risk of having, a disability or developmental delay. Services are provided in the child's natural environments.
  - The Franklin/Fulton County [Drug and Alcohol Program](#) (D&A) oversees county drug and alcohol prevention, intervention, treatment, recovery, and case management services. For the purposes of this report, as the Single County Authority (SCA), Franklin/Fulton County Drug and Alcohol Program, also known as FFDA, is hereinafter known as D&A.
  - Franklin/Fulton Mental Health/[Intellectual & Developmental Disabilities/Early Intervention](#) (MH/IDD/EI) and its community partners provide services to individuals at birth to three (3) years of age, children, adolescents, and adults with Serious Mental Illness, autism, or an intellectual or developmental disability (A-I/DD).
- [PerformCare](#) is Franklin County's managed care organization (MCO), which administers Medicaid behavioral health benefits for county residents through the [Pennsylvania HealthChoices](#) program.

## Law Enforcement/First Responders/Co-Responders

- The Franklin County Mental Health Co-Responder/Community Liaison (MHCR-CL) program is integrated within four police departments serving the boroughs of Chambersburg, Greencastle, and Waynesboro, as well as Washington Township. The MHCR-CL also acts as a community policing liaison between the department and the greater community.
- The MHCR-CL hours of service include weekdays between 8:00 a.m. and 4:00 p.m. They are also on-call as Mental Health Delegates, who may be required to review involuntary commitment petitions and documentation.
- The Mental Health Co-Responders are contacted by a police officers on call where the individual is known to have behavioral health challenges. If they are unavailable for dispatch, they will follow up with the individual based on the officer's report.
- The Borough of [Chambersburg Police Department](#) (CPD) is staffed with 35 full-time sworn police officers, one (1) Mental Health Co-Responder/Community Liaison (MHCR), and 3 administrative personnel.
  - Once officers arrive at calls-for-service that involve an unexpected behavioral health component, they can request that a Mental Health Co-Responder be deployed.
  - Other county agencies have mental health co-responders, including both Adult and Juvenile Probation, as well as the Public Defender's office.
  - All CPD officers and administrative staff are CIT trained.
  - CPD officers are provided continuing education on de-escalation practices and skills through annual training.
  - CPD has a Police Peer Support Team comprised of Peer Support Officers who offer confidential peer-based support to fellow officers dealing with traumatic events, stress, mental health needs, and other challenges. The department integrates peer support into its Officer Wellness Program, incorporating [Critical Incident Stress Management](#) (CISM), mental health programming, and a range of other supports.
  - CPD employs several veterans, who have proven beneficial when connecting with their peers in the community.
  - The Franklin County Sheriff's Office is responsible for the enforcement of laws throughout the county as well as serving warrants and other legal documents, providing court security and transportation of prisoners. Some Sheriff's deputies have received CIT training.
- The [Greencastle Police Department](#) provides law enforcement services in its community. The department participates in the MHCR-CL program with an on-staff mental health liaison.
- The [Mercersburg Police Department](#) is staffed by one (1) officer who is not yet CIT trained, but when help is needed with someone in crisis, they contact the Greencastle Police Department for assistance.
- The [Shippensburg Police Department](#) is staffed with five (5) full-time and two (2) part-time officers.
- The [Washington Township Police Department](#) provides law enforcement services in its community. The department participates in the MHCR-CL program with an on-staff mental health liaison.
- The Waynesboro Police Department provides law enforcement services in its community. The department participates in the MHCR-CL program with an on-staff mental health liaison.

- The Pennsylvania State Police Troop H Barracks provides law enforcement services for county areas that are not covered by the borough or township jurisdictions' police departments.
  - Some PSP troopers have received CIT training and certification.
  - The PSP is considering developing training similar to CIT and is compiling regional CIT contacts to collaborate.
  - All PSP troopers receive de-escalation training through the academy.
  - PSP provides law enforcement services for about one-half of the county's population, spanning the vast majority of the geographical space.
  - The PSP recently reached out to counties to invite them to consider taking advantage of the training and resources available through the PSP [Law Enforcement Training](#) page.
- When law enforcement officers connect with an individual in a SUD crisis, a deflection program provides an opportunity to connect them to a Certified Recovery Specialist (CRS) in lieu of taking the individual to a hospital or crisis care unit.
  - The CRS is an individual trained to provide support to individuals with SUD challenges. By connecting the individual with the CRS, the officers effectively deflect them away from the criminal-legal and hospital systems, reducing the impacts and costs on those systems. The CRS, in turn, works with the individual to connect them with area programs, services, and resources to help them address their SUD challenge.
  - A Noah's House, Inc. (a local recovery home) staff member is a CRS and has a good history working with law enforcement.

## Crisis Services

- [Keystone Health Crisis Intervention](#) provides crisis intervention services under contract with Franklin County MH/IDD/EI to serve county residents experiencing behavioral crises.
  - Keystone Health Crisis Intervention provides telephone, mobile, and walk-in services at the Chambersburg Hospital and answers the 988 line at the hospital's Crisis Office 24/7.
  - Staff provide 988 assistance at the Catherine Street location between 8:00 a.m. and 5:00 p.m.
  - Crisis Intervention, as well as walk-in behavioral health evaluations and medication management services, are available at the Catherine Street location between 8:00 a.m. and 5:00 p.m.
- The WellSpan Behavioral Health Unit at the Chambersburg Hospital serves individuals 18 years of age and older, but they must also be out of high school.
  - The availability of beds in the unit varies widely, from a few available beds to at-capacity.
  - If an individual is on Medicaid, there is no psychiatric boarding. Most individuals can obtain a bed within 48 hours.
  - Medical staff address any physical health conditions the individual may be experiencing.
  - The clinical staff examines and assesses the individual and decides the next steps. This may include recommending involuntary treatment services, inpatient crisis stabilization services on-site or at another facility, and typically includes their making recommendations for additional care through area programs, services, and other resources.

- Clients can get urgently needed prescriptions filled at the hospital emergency department if they have a prescription bottle with an active prescription.
  - Law enforcement workshop attendees did not have concerns about the amount of time they spend waiting in the emergency room with individuals transported in behavioral health crisis.
- The [Roxbury Psychiatric Hospital Adult Inpatient Psychiatric Program \(brochure\)](#) provides people in behavioral health crisis with 24/7 medical evaluation, medication-assisted stabilization services, and psychiatrist and nursing monitoring.
  - The program includes individual and family therapy, as well as small group therapy and activities, and recreational therapy, including art and music.
  - Roxbury's Co-Occurring Disorder Service provides medical detoxification (detox) services and supervision, substance use and co-occurring group therapy and education, discharge planning, connections to area programs, services, and resources, and referrals to their inpatient rehabilitation services.
- [Roxbury Treatment Center](#) offers outpatient walk-in services weekdays during business hours. They provide alcohol and other drug screening and assessment services for referred individuals as well as those who need one for employment, for the courts, or to begin their personal recovery. Roxbury's admissions department is available by phone 24/7 at 800-648-4673.
  - Roxbury outpatient SUD treatment programming includes:
    - Intensive outpatient programming (IOP) three (3) hours a day, three (3) days each week, for approximately six (6) weeks. The program provides individual and group therapy focused on maintaining sobriety. They may utilize Vivitrol for people who want medication-assisted therapy.
    - Outpatient programming through weekly 90-minute group counseling sessions. Treatment spans eight to twelve (8 to 12) weeks and includes co-developing a treatment plan, monitoring, random drug screens, and achieving treatment plan goals.
  - Roxbury inpatient SUD treatment programming for adults 18 years and older includes:
    - Substance use and co-occurring condition treatment services, including detox, MAT, individual, group, and family counseling, education, 12-step programming, health and fitness activities, and medication management services.
- WellSpan [Emergency Medical Services \(EMS\)](#) provides the majority of EMS services for Franklin County residents.
  - A network of local, volunteer, and private EMS agencies also serves residents, and all are deployed through Emergency Communications 9-1-1 dispatchers.
- Pennsylvania crisis services are in a state of flux, including recently approved and forthcoming state legislation that amends behavioral health crisis and treatment providers' facility licensing to ensure they make their services more available, including:
  - DDAP now permits outpatient drug and alcohol treatment providers to obtain a telehealth-only license without maintaining a physical clinical location. This regulatory update is intended to expand access to treatment—particularly intake, assessment, and outpatient counseling services.
  - Pennsylvania [House Bill 564](#) (2025-2026 Session) includes provisions that propose:
    - Mandating 24/7 mental health crisis services

- Expands requirements for licensed facilities to provide immediate access to crisis services for any behavioral health emergency
- Supports crisis walk-in centers and other crisis-response models to remain open and accessible 24/7
- Directs 9-8-8 and other emergency response systems to accommodate no-wrong-door access
- [Waynesboro Community & Human Services](#) provides basic needs, including food, clothing, emergency assistance, and case management, to individuals and families in need.
- [Salvation Army of Eastern Pennsylvania](#) provides a range of support services for children, adults, and seniors, including:
  - A community meal program provides breakfast and lunch most days (except Thursday and Saturday)
  - Personal care services such as laundry and shower services
  - A Family Store for second-hand clothing, household items, and more
  - A safe space for non-custodial supervised parental visits with their children
  - Social programs, services, and activities for children
- [Momentum Services](#) provides behavioral health treatment services for people of all ages.
- [Ophelia](#) provides MAT services and clinical care meetings via telemedicine.
- [The Franklin/Fulton Drug and Alcohol Program \(FFDA\)](#) provides a range of resources for people actively using and those seeking help with recovery.
- Franklin County Veterans Affairs (VA) provides Veterans and their families with assistance in securing their entitled health and other benefits, as well as information and recommendations on area programs, services, and resources. The [Cumberland County Office of Veterans Affairs](#) team has been working alongside the OVA as they bring on new team members.
- Franklin County is developing a plan to formalize Mobile Crisis Response services in the county, with Keystone CCR and WellSpan. Although WellSpan is licensed to provide MCR services, it currently serves only individuals who are commercially insured and reside in nearby Adams, York, and Lebanon Counties.
- [Waynesboro Human Services](#) provides human services, including food, clothing, and emergency financial assistance to residents of Waynesboro and Greencastle.

### **Training and Education**

- DDAP training is available to case workers to learn how [the ASAM Criteria](#) is utilized to determine an individual's needs and level of care more effectively.
- [Mental Health First Aid Training \(MHFA\)](#) teaches individuals and groups the skills needed to support people in their networks and families, including those who may be experiencing a mental health crisis. MHFA training is offered by [TrueNorth Wellness Services](#) (TrueNorth) and [Mental Health Association \(MHA\)](#).
- The term 'crisis' is typically used to describe an individual in mental health distress. It also may include individuals in substance use crisis, which is typically identified as such through the American Society of Addiction Medicine (ASAM) assessment toolkit.
  - Developing an integrated, person-centered crisis services system around behavioral health will better serve people experiencing mental health and substance-use challenges while improving access to care. Key components include co-creating flexible

language with those receiving services and adhering to SAMHSA best practice guidelines.

## Housing

- Franklin County residents seeking emergency shelter are referred to Franklin County shelters through 2-1-1. Beds are typically available to individuals and families for up to 30 days.
  - The [Franklin County Homeless Shelter](#) primarily serves individuals, and some families, who stay between 14 and 30 days, with a focus on finding affordable housing. The shelter is a service of [South Central Community Action Programs \(SCCAP\)](#).
  - The [Waynesboro New Hope Shelter](#) provides emergency shelter for individuals and families. New Hope helps approximately 150 each year, including one-third children.
  - The [Maranatha Ministry](#) cold weather drop-in shelter is usually open from December through March 31<sup>st</sup>. Maranatha is a faith-based organization that also provides a year-round food pantry and a personal counseling service at no cost.
- [Women in Need Victim Services](#) provides women experiencing domestic violence with emergency housing. Women or referrers can contact their hotline 24/7 at 717-264-4444 or, toll-free at 800-621-6660.
- An emergency housing facility for Veterans is being developed. A community group is in the initial stages of planning, developing, and licensing a new facility for the winter. Their goal is to provide shelter from November through April, with operating hours from 7:00 p.m. to 7:00 a.m.
- [Noah's House, Inc. Recovery Homes](#), a DDAP-licensed recovery housing provider, is expanding the number of beds available for individuals who are unsheltered, including those who have recently survived an opioid overdose.
  - Noah's House staff identify and interview individuals presenting at hospital emergency departments who are experiencing unsheltered homelessness. Referrals may also come directly from emergency department staff or other community partners.
  - If the individual screens as appropriate for services and expresses interest in working with Noah's House staff, they may be offered a short-term emergency placement to provide immediate stabilization and support.
  - Noah's House contacts the Franklin/Fulton Drug and Alcohol Program (FFDA) within 24 hours so that FFDA case managers can complete a Drug and Alcohol Screening and an ASAM Level of Care Assessment.
  - Individuals may transition from the short-term emergency stabilization placement into DDAP-licensed recovery housing operated by Noah's House—either the 10-bed women's home or the 14-bed men's home—depending on eligibility and availability.
- The [PATH](#) program provides people with mental health challenges assistance with their housing situation, including people facing eviction. PATH will work with the individual to find stable housing and provide the down payment to help them into their home.
- The [Mental Health Association \(MHA\)](#) provides a supportive housing program that includes a short-term rent subsidy until the individual secures a HUD voucher. The program is available to individuals who are Medicaid-eligible and includes additional support services.
- The [Franklin County Housing Authority](#) assists with public housing applications and related support.

- County Community Navigators have access to a limited amount of contingency funds to help individuals with Medicaid (or those who are eligible to receive Medicaid) who are facing eviction.
- A long-term structured residence with eight (8) beds for people reentering from incarceration is being developed in Perry County, which lies between Franklin and Cumberland Counties.
- The Blue Heron senior housing project is in the early stages of planning and development by Luminest Community Development to be located within the Borough of Greencastle. The project plan includes dedicating one (1) unit for a senior with mental health conditions.
- Victory House by [I'm OK Vets](#) is located in Chambersburg, which will provide supportive housing and services for Veterans in the Chambersburg region.
- A limited number of residential and shelter beds are available to Franklin County, even though they are a distance from Chambersburg, including:
  - [TrueNorth Wellness Services](#) offers two (2) Community Residential Rehabilitation (CRR) program beds in Hanover County to serve people reentering the community from incarceration.
  - TrueNorth is currently in talks with Perry County, which is developing a Forensic Long-Term Structured Residence with eight to sixteen (8 to 16) beds, and plans to open in 2026.
  - Franklin County is grateful for a limited partnership with Hagerstown, Maryland, which offers emergency overflow shelter beds if they have available capacity.

## **Peer Support**

- CISM training, peer-led debriefings, and support by peers can be available within law enforcement departments that adopt the training, used by individuals who have experienced a traumatic event.

## **Collaboration**

- The [United for Recovery and Prevention Taskforce](#) comprises 70 representatives from county boroughs and townships, as well as agencies and organizations within the community. Their general monthly meeting hears reports from several sub-committees focused on prevention, treatment, recovery, law enforcement, communications, and data-related elements.
- The Franklin County [Criminal Justice Advisory Board \(CJAB\)](#) is a forum of area leaders collaboratively working to improve the criminal-legal system, including providing services to victims of crime.
  - The [2025-2028 CJAB Strategic Plan](#) details their history and outlook for the next three years.
  - CJAB has several committees for stakeholders to focus their contributions and include the Behavioral Health, Criminal Case Flow, First Contact, Juvenile Justice, Victim Impact, and Executive Committees.
  - Several Strategic Priorities include multiple priorities and strategies. Priority categories and some strategies include, in part:
    - The Public Safety and Crime Prevention priorities are focused on prevention and early intervention; treatment, punishment, and recidivism, including strengthening diversion opportunities; social services support and victim support, including:

- The Adjudication and Judgement priority is focused on supporting resources for timely adjudication.
- The Justice Reinvestment priorities are focused on enhancing pretrial services, strengthening data-driven decision making, and the application of current research founded on empirical data, and more.
- The Criminal Justice System-Wide priority is to strengthen collaboration and understanding of CJAB by both external and internal stakeholders.

## Collection and Sharing of Data

- [Healthy Franklin County](#) (HFC) will host the Franklin County Health Summit on October 14, 2025, where WellSpan Health will present the [2025 Community Health Needs Assessment](#) (CHNA).
- [PA Navigate](#) is the new Pennsylvania Health Information Exchange (HIE) that centralizes Pennsylvanians' health information records and provides a platform for residents to access information about available social services.
- The Here to Help initiative is a collaborative effort between the county and WellSpan Health. The focus is on better identifying, documenting, and addressing Health-Related Social Needs (HRSN) for county residents through shared data and coordinated referrals among healthcare providers, insurers, and community organizations.
  - 'Here to Help' is connected to the PA Navigate platform.
  - Most area hospitals are engaging in the Here to Help initiative and utilize PA Navigate.
  - The county is working with WellSpan to develop a stakeholder questionnaire.
- The Franklin County website contains a thorough collection of well-organized pages, including:
  - The [County Departments Directory](#) provides summaries and links to criminal-legal and behavioral health-related county agencies and departments.
  - The Mental Health page provides a program [directory](#) with summaries and links to additional resources as well as an [interactive map](#) of behavioral health-related programs, services, and resources.
  - Insight into Franklin County residents' health, needs, and strategies for improvement is available through key reports and plans, including:
    - 2025 WellSpan Health [Community Health Needs Assessment](#) (CHNA) and
    - WellSpan Health [Community Health Improvement Plan](#) (CHIP)
    - The [CARES Assessments](#) tool allows you to create custom CHNA reports. Build a customized [Franklin County, PA Community Needs Assessment](#) report after selecting which metrics to include.
- The Office of Drug Surveillance and Misuse Prevention's [Fatal and Non-Fatal Drug Overdose Surveillance | Interactive Data Report](#) provides insight into Pennsylvania's substance-use impact data.

## GAPS

- It was unclear which Determination of Eligibility Script (DES) screening tool is being utilized by 9-1-1 operators. The tool includes questions used to identify mental health issues, administered to people in a behavioral health crisis or those who are flagged for additional assessment. The responses are used to inform county agencies.

- The Instrument for the Evaluation of Acute Depression (IEAD) is used throughout the state primarily to evaluate individuals for suicidal ideation and other acute mental health symptoms.

### **9-1-1/Dispatch**

- 9-1-1 does not have a direct dispatch option for co-responders; police are privately calling their co-responders.
- Because co-responders cannot be dispatched directly, participants reported instances of communication breakdown, which resulted in co-responders not being contacted by police officers on scene.

### **Healthcare**

- There is frustration by law enforcement when taking people to the hospital for urgent care and seeing them released relatively quickly. It is believed that the individuals know how to manipulate the system using state law and to avoid care.
- Within the WellSpan Chambersburg hospital:
  - The Emergency Department doesn't always notify the crisis services unit of individuals who survive overdose incidents, resulting in survivors leaving the hospital without information about opportunities for treatment, care, and available resources.
  - The Emergency Department is said to be relatively dehumanizing due to a lack of space between the intake and seating areas, resulting in a lack of privacy when the individual is sharing their medical and mental health situations.
- There is a need for 24-hour access to mental health or substance use urgent care services. Currently, individuals in crisis are often unaware of available programs and services and their hours of operation, making access challenging.
- Parole has never taken anyone to an urgent care walk-in in lieu of the hospital, which might be due to the program being new and its location and/or hours of service.
- Franklin County reports a relatively low readmission rate for psychiatric inpatient hospitalizations of 13.02%. Readmission rate for 2025 is 10.56%.
- Approximately 200 pharmacies have closed across the state, causing concerns about individuals losing access to prescription medications.

### **Law Enforcement and First Responders**

- It was unclear if and how CIT-trained FCSO deputies could be specifically dispatched, if there was policy or protocol, and if 9-1-1 dispatchers had the discretion to make the request.
- There is a need for CIT training and certification for PSP troopers, which is difficult because of the 40-hour time commitment. Although the PSP Troop H command is open to CIT training, they are challenged by having to take troopers out of service for a 40-hour training program.
- There have been cases where charges are added to an individual's case due to their behavior while being transported by officers, e.g., disruption, kicking, or spitting, when those things may likely not have occurred had the individual been de-escalated.
- A Law Enforcement Assisted Diversion (LEAD) program is not being utilized in Franklin County.
- The FC [Get Back Up](#) program was discontinued in June 2025. Get Back Up was a law-enforcement program that allowed an individual to enter SUD treatment in lieu of arrest and prosecution.

- The program allowed individuals to surrender illegal drugs at their local police station without facing charges and to ask for help with their addiction.
- It allowed officer discretion, if the individual agreed to treatment and to work with a Recovery Liaison with lived experience, to participate in treatment.
- The individual participated in their treatment program and was connected with step-down opportunities to continue their recovery.
- And the individual stayed connected with the Get Back Up Team throughout their journey.
- The PSP and local police departments had been utilizing the CRS deflection program, referring individuals to Franklin County CRS, but have done so less due to inconsistent training and awareness of the opportunity, as well as staffing changes and turnover.

## **Crisis Services**

- Behavioral Health Medicaid still requires a physical service location for network enrollment, which limits reimbursement options. Without Medicaid enrollment, the FFDA cannot contract with a provider for funded services. Additionally, while DDAP licensing ensures regulatory and policy compliance, telehealth-only programs may require further consideration regarding clinical quality, oversight, and long-term sustainability.
- Although Keystone is a licensed mobile crisis service provider, the understanding of workshop participants was that, in practice, they are rarely dispatched into the field. The county is writing a plan to address the issue for approval by the Office of Mental Health and Substance Abuse Services (OMHSAS).
- There have been reports by overdose survivors who have been transported to Meritus Health in Hagerstown, MD, for services, indicating that the quality of those services has been lacking.
- Emergency Departments are required to have a warm hand-off policy in place for substance users. The county has been working with WellSpan for years, and it has been a challenge. They are working on developing peer support to help with the process.
- People have reported that when trying to access crisis services in the county, they are told to first go to a hospital emergency room for medical clearance, creating a barrier to utilizing non-hospital crisis services. Keystone Urgent Care is not available 24/7, which is impacting individuals seeking a medication provider.
- Franklin County lacks any public transportation services, limiting people's ability to access care.

## **Housing**

- Area shelters are typically at capacity, which has made it difficult for people to find a bed.
- Both Noah's House homes are typically full, and both are maintaining waiting lists.
- There is a lack of sufficient warm handoffs of individuals to aftercare providers.

## **Peer Support**

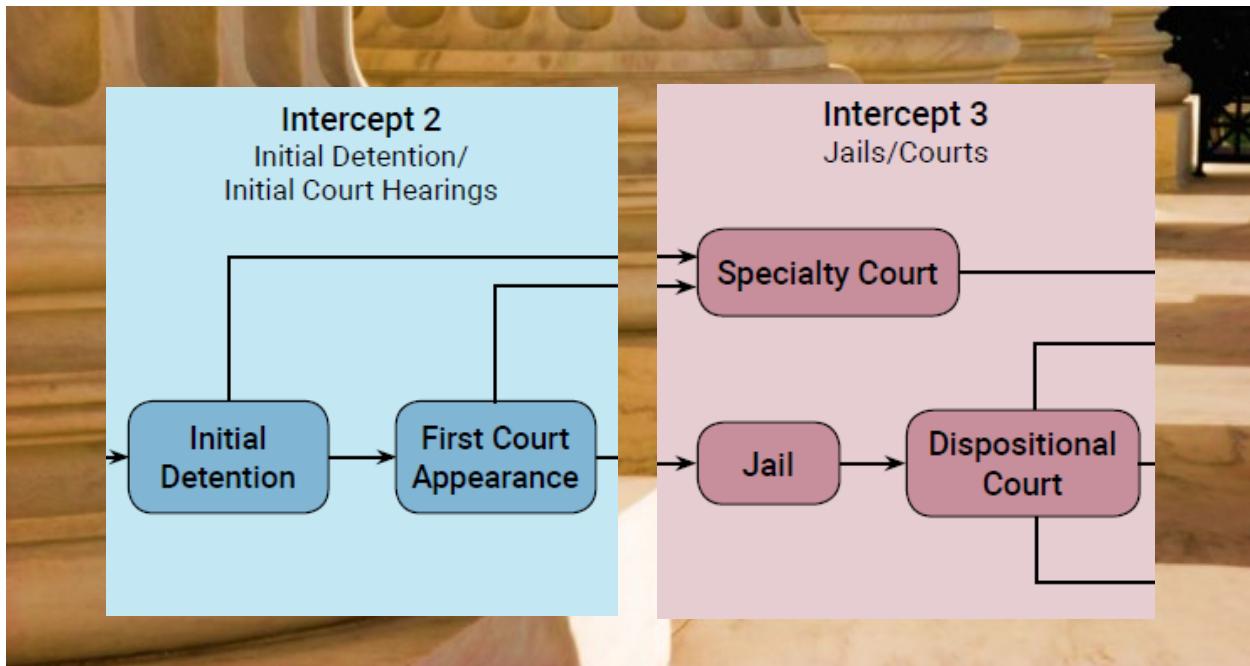

- Although the program has shown success, the use of the Certified Recovery Specialist (CRS) role and the deflection program has waned significantly.

## **Collection and Sharing of Data**

- Data about calls for service to 9-1-1 and 9-8-8, as well as the number of callers that were referred to dial the other number, was not known to be available.
- There is no systematic process of identifying high utilizers of services or planning how to address their impacts.
- There were concerns discussed about stakeholder-agencies and organizations' difficulty working with hospitals across the behavioral health systems.

## INTERCEPT 2: INITIAL DETENTION & COURT HEARINGS; AND INTERCEPT 3: JAILS/COURTS

### OPPORTUNITIES

#### Booking

- When law enforcement brings an individual to the Franklin County Jail (FCJ) for booking, and the individual is presenting as intoxicated, self-medicating, or is otherwise not medically well, they must first be medically cleared. Officers will take the individual to the local emergency department for an examination and evaluation.
- Most individuals entering the FCJ are first transported to the central booking area for intake:
  - The arresting officer completes a triage form, which includes questions about their observations of the individual, including risk of self-harm and harm to others.
  - A brief medical assessment is conducted by PrimeCare Medical (the FCJ medical provider of physical and behavioral health services) to clear the individual medically.
  - The individual is not fully booked, classified, and housed in the FCJ until after the preliminary arraignment court hearing is held, typically the same day or the first business day after their arrival.
    - If they are to be held, an FCJ officer administers the booking screening, including the individual's medical history and current medical status.
    - The FCJ medical provider administers a medical assessment and a suicide-risk assessment. The team will look for responses that may lead them to classify the individual for placement in mental health housing.

- Once completed, the officer and medical provider determine the individual's housing classification and status.
- To confirm medication prescriptions, the individual's self-reported pharmacy is contacted. Prescriptions can also be verified using a current bottle or documentation from a prescribing medical provider. For controlled substance prescriptions, the providers have access to the Prescription Drug Monitoring Program (PDMP) online portal for confirmation.
  - FCJ will accept medication from family members and/or if the individual brings their medication with them to jail.
  - Information about current medication is received through self-report. Once the medical department confirms the prescription, they will dispense the medications accordingly.
  - PrimeCare will reach out to pharmacies and providers to confirm medication information.
  - If an individual arrives at the FCJ while on a MAT protocol, PrimeCare will verify the prescriptions and continue dispensing them during their stay.
  - If the individual has been in the FCJ in the recent past, a record of their medications should be in the system.
- Mental health clinicians work weekdays, Monday – Friday, between 8:30 a.m. and 4:30 p.m. The Psychiatrist is available via telehealth. A Psychiatric Nurse Practitioner offers services at the FCJ on Tuesdays.
- The PrimeCare detox medication protocol is followed when individuals being booked into the FCJ present as under the influence, including:
  - Klonopin, thiamine, and folic acid for individuals with alcohol intoxication.
  - T-3, Subutex, or clonidine for opiate users.
  - Klonopin is used for benzodiazepine (benzo) users.
  - Seroquel is used for methamphetamine users.
  - The length of prescription dispensing orders typically spans between five and ten (5 - 10) days, depending on the severity of symptoms and the provider's orders.

## **Jail Structure and Personnel**

- [Franklin County Warden](#) manages the [Franklin County Jail](#) (FCJ)
  - The FCJ comprises nine (9) resident units.
  - FCJ has a maximum capacity of 500 individual adult men and women 18 years and older. FCJ may also hold juveniles when necessary.
  - FCJ provides minimum, medium, and maximum security.
- Staff from FCJ, PrimeCare, and the MH/IDD/EI department meet weekly to review all detainees with an Administrative Segregation Mental Health status.
- The FCJ lobby holds a Naloxone access point for individuals being released and their families to take a supply of doses home with them.
- Individuals are released from jail each day between the hours of 8:30 a.m. and midnight.

## **Jail Services**

- The FCJ contracted with Prime Care to provide medical and behavioral health services within the FCJ.

- PrimeCare Medical provides 24/7 physical health services through their physicians and Licensed Practical Nurses.
  - The medical staff provides basic medical care
- PrimeCare mental health treatment services are provided by clinicians who provide crisis counseling, stabilization, and MAT program treatment elements.
  - Most clinical staff are on-site in the FCJ and work weekdays 8:30 a.m. to 4:30 p.m., including:
    - One (1) part-time Psychiatrist providing remote tele-psychiatry four hours per week
    - Four (4) full-time mental health clinicians
    - One (1) full-time clinician focused on providing MAT services
    - One (1) part-time Psychiatric Nurse Practitioner (PNP), four (4) hours each week
  - The team co-develops a treatment plan with program recommendations with the individual.
  - PrimeCare writes and sends prescriptions to Keystone Pharmacy, including a 10-day supply for general prescriptions, and a 14-day supply for MAT program participants.
  - The team provides individual counseling and manages the sex offender treatment program group.
  - There were no mentions at the workshop of individuals having any difficulties accessing their medications while incarcerated.
- When ordered by the MDJ, mental health and SUD assessments and evaluations are completed.
  - The FCJ sends the referrals for SUD evaluation to Franklin County D&A, which are conducted within a few days of the request. Once the D&A evaluation is completed, the PD can help the individual be released from jail and into residential or outpatient treatment services.
  - The county contracts with TrueNorth for remote psychiatric assessments and evaluation services.
- A D&A Case Manager provides detainees transitioning back to the community with level-of-care assessments, care coordination, and assistance with non-medical needs.
- A Certified Recovery Specialist (CRS) is being hired to provide direct recovery services care at the FCJ as well as to facilitate therapy groups. The CRS also collaborates with outpatient treatment providers and community-based recovery organizations.
- The names of individuals booked into the FCJ are shared through [Service Access and Management \(SAM\)](#), which provides assessment, evaluation, and case management services.
- FCJ offers a range of treatment and educational programs to provide individuals with behavioral health challenges opportunities for care and information they can use to succeed in their recovery.
  - Within 21 days of booking, staff administer the [Ohio Risk Assessment Scoring \(ORAS\)](#), which informs the co-development of the individual's treatment plan, and focuses on the individual's recovery priorities.
  - Several general treatment program groups are available, including:
    - Moral Reconation Therapy (MRT)
    - Stress Management
    - Life-skills
    - Parenting

- Anger Management
- Victim Impact Awareness
- Drugs and Alcohol
- Life after supervision
- Job skills training.

- The FCJ Jail to Community Treatment program provides substance use treatment services utilizing assessments, counseling, and MAT.
- FCJ staff also provide training and educational program elements, including high school education classes, GED preparation classes and testing, and English as a Second Language classes.
- Religious services include individual and group sessions facilitated by the FCJ Chaplain and supported by volunteers.
- Franklin County D&A facilitates two monthly group sessions in the FCJ:
  - A CRS educational group
  - Operation Save-a-Life Naloxone training to learn how to reverse an opioid overdose by administering one or more doses
- TrueNorth, a contracted outside provider, conducts psychiatric evaluations on an as-needed basis
- MHA is an outside provider that provides peer support services
- Celebrate Recovery is an outside provider that facilitates in-reach into the jail
- The following tables provide a snapshot of the FCJ's population and program operations' metrics for one recent month, June 2025:

**Table 1: Snapshot: June 2025 Franklin County Jail Population report**

#	Metric	#	Metric
<b>Booked and Discharged</b>		<b>Average Population</b>	
129	Commitments (detainee bookings)	70	Days, average length of stay for the month
124	Discharges (released)	54.6	Days, average length of stay, all 2025
<b>Point in Time Status (July 1, 2025)</b>		<b>Special Population</b>	
117	Sentenced detainees	3	Juveniles are held in other county jails
162	Unsentenced detainees	4	Detainees from other agencies are held in FCJ
279	Total Detainees (Includes 3 held for other counties, 3 on approved temporary absences, and 6 awaiting transport to state institution)		
<b>Demographics</b>		<b>Recidivism Rate</b>	
75%	Male population	38%	All commitments
25%	Female population	34%	Detainees are committed on new charges
68%	White population		
33%	Aged 25 to 34 years old		
72%	Single status		
84	At least high school diploma		
<b>PrimeCare: Medical &amp; Behavioral Health</b>		<b>Other Status</b>	
1,126	PrimeCare sick calls	0	Detainees at Torrance State Hospital
14	Trips to the Emergency Room	1	Awaiting transfer to Torrance State Hospital
1	Hospital admission for 2 days	3	Detainees under constant observation
		4	Pregnant detainees

PrimeCare: Mental Health		PrimeCare: Substance Use and MAT	
830	Mental health contacts	33	Placed on detox protocol
180	Mental health caseload	66	Medication-Assisted Therapy (MAT) program
37	With an SMI diagnosis		

**Table 1b: Intermediate Punishment Report (June 2025)**

#	Status	#	Program
<b>Pre-Release Services</b>		<b>Sentencing Programs</b>	
58 Pre-Release intakes		924	Community Service hours completed
46 Pre-Release discharges		<b>In-Jail Program Participants</b>	
<b>Employment</b>		83	Drug and Alcohol RIP/DCIP program
5 Employed detainees		53	Pre-Trial Supervision program*
<b>Violations and Sanctions</b>		42	Sex Offender Program
12 Detained number of individuals		32	Mental health caseload
18 Sanctioned number of detainees		210	Total Program Participants
*3 RIP/DCIP program successful discharges			
<b>Community Program Participants</b>			
11 Electronic Monitoring (EM) program detainees			
20 Good Wolf Treatment Court participants			
31 Total Community Program Participants			

Source: Franklin County Prison Board Minutes [July 8, 2025](#)

- Some observations of this month's FCJ report include:
  - 42% of detainees have been sentenced.
  - 58% of detainees are in pretrial status.
  - 65% of total detainees are receiving services from PrimeCare mental health clinicians.
  - 21% of mental health caseload have SMI diagnosis (13% of the total population).
  - 67% of detainees are 18-24, or 35+ years old.
  - 75% of all detainees are participating in in-jail treatment programs.
- The report also reflected the number of jail-bed days saved through utilizing these alternatives: *"There were 153 daily jail bed days saved by using the alternative sanctions of electronic monitoring (331 days), DCIP/D&A RIP (2525 days), intensive supervision (112 days), and pre-trial release (1622 days)."*

## Competency

- When county residents need competency restoration services, they are held in jail or remain in the community on conditional release. They are placed on a wait list for transportation to the DHS-funded OMHSAS [Torrance State Hospital](#) (TSH). The hospital provides restoration services for state residents through its in-house Regional Forensic Psychiatric Center (RPC) staff.
  - This year the county has filed 14 orders for competency restoration services, including eight (8) between January and July 2025, and six (6) in August 2025.

- A Pennsylvania OMHSAS committee commissioned best practice guidance for state and county competency restoration programs and services in the [A Comprehensive Review of Pennsylvania's Competency Restoration Services: A Path Forward](#) (April 2025) report.

## Pre-trial Services

- The Franklin County [Adult Probation/Parole Department](#) (Probation) provides pre-trial services, including court-ordered supervision, coordinating treatment and other programs and services, and monitoring bail and conditions of release.
  - The Pretrial Release Officer (PTRO) administers the [Ohio Risk Assessment Scoring \(ORAS\)](#) instrument in instances where releasing the individual before their next hearing is being considered.

## Initial Court Hearing

- The [39<sup>th</sup> Judicial District Court of Common Pleas](#) hears criminal cases in Franklin County.
  - An individual's first appearance in front of the court is held shortly after they are booked into the FCJ.
  - A Pennsylvania Magisterial District Judge (MDJ) hears preliminary arraignments of individuals with warrants and others who have been booked into the FCJ within the same day of arrest, or by the next business day. The MDJ hears the charges, provides a copy of the complaint to the individual, and determines bail and any conditions of release.
    - In cases where the individual states they are indigent and/or cannot afford an attorney, individuals are encouraged to apply for defense services. The MDJ can assign a Public Defender (PD) to represent the individual, and the PD will likely make initial contact shortly after the arraignment.
    - The MDJ sets the date for the preliminary hearing for not less than three (3) business days and not more than ten (10) business days following the preliminary arraignment.
  - Franklin County has seven (7) MDJs. Each has its own unique set of questions it asks individuals who are charged, so that they can make bail decisions.
  - Law enforcement officers from some jurisdictions complete their department's bail worksheet and will present that report to the MDJ.
  - This report typically includes details and circumstances related to the crime, their interaction with the individual, the individual's criminal history, and their level of support, if any, for the court to offer bail conditions.
- The MDJs and the Franklin County Jail Central Booking Officers communicate daily to ensure all new arrestees brought into the jail are properly arraigned. The PD and Probation meet to discuss the case during the period between arraignment and preliminary hearing. If the defense attorney identifies concerns about the individual's behavioral health during this 14-day window, they may initiate the process to have an assessment and evaluation conducted.
  - The PD contacts the court co-responder to inquire about the service so they can make recommendations to the court. SAM provides the evaluation services.

- A District Judge hears the preliminary hearing. Private counsel or the PD can represent the individual if one was assigned. The judge hears the DA present the charges and evidence supporting probable cause for arrest.
  - If a PD was not assigned during arraignment or thereafter, the judge may decide to assign a PD to the individual.
  - The case is either dismissed or bound for the Formal Arraignment hearing.
- The formal arraignment hearing is held where the PD is confirmed as their counsel, and the PD can file any pretrial motions.
  - Formal applications to the Drug Treatment Court or to alternatives to incarceration programs are offered by this hearing, and typically before the hearing date.
  - The next hearing is the Pretrial Motions and Pleadings hearing, which is held no later than 30 days from the arraignment hearing.
  - The next hearing is the Call of the Criminal Trial List, where the individual accepts or rejects pleas, and when the individual's application to treatment or other programs is accepted or rejected.
- The Franklin County [District Attorney](#) (DA) is the lead prosecutor and law enforcement officer, guiding every stage of the criminal-legal process, including charging, prosecuting, diversion, trial strategy, and public safety leadership. They also work to ensure victims are protected.
  - The DA publishes a [Criminal Procedure](#) page to explain how an individual facing criminal charges is processed through the courts.
- The Franklin County [Public Defender](#) (PD) is a county-funded office that provides legal defense services to individuals who are indigent or cannot otherwise afford private defense services.
- The Franklin/Fulton Drug and Alcohol (D&A) (aka Single County Authority (SCA)) provides drug and alcohol programs and services, as well as contracts and collaborates with service providers.
  - A D&A pilot program pairs their case managers with a clinician from a contracted provider, Pyramid. The team visits the FCJ and conducts level-of-care assessments.
    - If the client declines Pyramid conducting the assessment and evaluation, D&A will send a case manager to conduct the assessment. Since the pilot's launch, assessments have increased.
    - The courts consider these assessments when deciding to release the individual.
  - The court can order the assessment as a condition of release.
  - When the FCJ receives the order, they identify the individual's condition and make referrals for services.
  - If the court hasn't initiated this process, the PD or defense attorney is responsible for ensuring it is ordered. The PD files the motion and recommends that private defense attorneys do the same, for the court to modify bail and release the individual at the preliminary hearing with appropriate conditions of release.

## Problem-Solving Courts

- The case moves forward into the Franklin County Court of Common Pleas, as part of the 39th Judicial District, which is responsible for trying the case, as well as managing the judicial side of two primary programs:

- The [Good Wolf Treatment Court](#) is a specialized court-supervised drug treatment sentencing program for people who have been convicted of low-level criminal offense charges while also having an alcohol, opioid, or other substance-use challenge.
  - The treatment court has a capacity of thirty (30) participants, and at the time of the workshop, twenty (20) individuals were participating in the program. In August 2025, three (3) participants successfully graduated from the program.
  - Franklin County D&A or the Treatment Court Coordinator evaluates candidates.
  - The county DA manages the prosecution side of the Treatment Court program and makes recommendations to the court to offer and accept candidates, to graduate successful participants, or to drop unsuccessful participants and continue their sentencing. The Treatment Court has several operational components, including:
    - A treatment coordinator and case manager from the court oversees each participant's case.
    - A Probation Officer (PO) is assigned to the court and manages the supervision of each participant.
    - Participants work through six (6) phases of the program and move up as they complete the elements of each phase. These elements typically include attending frequent court hearings, participating in treatment services, attending individual and group therapy sessions, remaining abstinent and submitting to random testing, not reoffending, performing community service, and actively working towards recovery.
  - The Drug and Alcohol program is working to hire a Certified Recovery Specialist to serve the Treatment Court and Probation office.
- The [Accelerated Rehabilitative Disposition](#) (ARD) court program may be offered to individuals with less serious offenses and a limited or no criminal record. Although the ARD is commonly used for DUI offenses, at the discretion of the District Attorney, individuals with low-level non-DUI offenses, such as theft, drug possession, and other misdemeanors, may also qualify.
  - ARD is managed through the Adult Probation DUI/Investigative Unit.
    - Participants agree to a probationary sentence with all conditions set by the court, which include, at a minimum:
      - Not reoffending
      - Agreeing to being assessed for alcohol and other drug use, agree to abstinence, and complete an appropriate treatment program
      - Participating in a Mothers Against Drunk Driving (MADD) Victim Impact Panel to hear from victims and survivors of DUI injuries and deaths
      - Performing at least 25 hours of community service work
      - Paying the court fines, program fees, and restitution to victims harmed

- While ARD participation spans between 30 and 90 days, the participant will remain under Probation supervision for the remainder of their 12-month probation sentence.
- If the individual fails to meet their obligations, they may be removed from the ARD, and the DA may choose to continue prosecution of the original and any new offenses.
- A system goal is to administer an ORAS for every person arrested for criminal offenses and to inform the MDJ about their situation.

**Table 2: Franklin County Sentencing Programs and Other Alternatives: Summary Table**

Program	Eligibility	Program Elements
Drug and Alcohol- Probation Partnership (DAPP)	<ul style="list-style-type: none"><li>▪ Level 3 and 4 non-violent offenses</li><li>▪ Alcohol or drug dependent</li><li>▪ RPS sentenced</li></ul>	<ul style="list-style-type: none"><li>▪ Multi-disciplinary team</li><li>▪ PO supervision</li><li>▪ Team communicates with participant, employer, family, and treatment provider</li><li>▪ EM monitoring, frequent substance testing</li><li>▪ Weekly reporting</li><li>▪ Completion satisfies RIP component</li><li>▪ If the Intensive phase is incomplete, move to enhanced</li></ul>
Pre-Trial Release	<ul style="list-style-type: none"><li>▪ If alcohol or drug offense: Participate &amp; complete SUD treatment</li></ul>	<ul style="list-style-type: none"><li>▪ Court and Probation approve participation</li><li>▪ Report to Pre-Trial Release Officer</li><li>▪ Maintain existing employment or become employed</li><li>▪ Regular alcohol and drug testing</li><li>▪ No victim contact</li><li>▪ Violations result in bail revocation and return to FCJ</li></ul>
Good Wolf Treatment Court	<ul style="list-style-type: none"><li>▪ Non-violent offenses</li><li>▪ Substance use problem</li></ul>	<ul style="list-style-type: none"><li>▪ Court-supervised drug treatment</li></ul>
Restrictive Intermediate Punishment (RIP)	<ul style="list-style-type: none"><li>▪ Level 3 or 4 offenses, or</li><li>▪ Numerous convictions</li><li>▪ Drug dependent</li><li>▪ Eligible sentence length</li><li>▪ DAPP or DCIP program</li></ul>	<ul style="list-style-type: none"><li>▪ Intensive Case Manager</li><li>▪ Variety of treatment options</li></ul>
Dedicated County Intermediate Punishment Programming (DCIP)	<ul style="list-style-type: none"><li>▪ Non-violent Level 3 or 4</li><li>▪ Serious to very serious offenders with numerous prior convictions</li><li>▪ Assessed with SUD</li><li>▪ Eligible sentence length</li></ul>	<ul style="list-style-type: none"><li>▪ Drug and alcohol offenses, and other cases</li><li>▪ Option for Level 3 or 4 that do not qualify for DAPP</li><li>▪ IPS must require treatment at the level recommended by assessment results</li><li>▪ DCIP supervises all Level 3 &amp; 4 IP sentences, including RIP components of EM and Intensive Supervision</li></ul>
County Intermediate Punishment Programming (CIP) & Qualified CIP	<ul style="list-style-type: none"><li>▪ Not Level 3 or 4</li><li>▪ Pays all EM fees prior to discharge</li><li>▪ County sentenced</li><li>▪ Complete approved sanctions</li></ul>	<ul style="list-style-type: none"><li>▪ A qualified Probation Specialized Services Unit supervision</li><li>▪ PO supervises all non-Level 3 &amp; 4 IP sentences requiring EM, including vehicle offenses, or some Level 2 offenses</li><li>▪ May include any/all: drug and alcohol treatment, EM, house arrest, work-release, and halfway house</li><li>▪ May issue Alternative Disposition Agreements for infractions</li></ul>
Intensive Supervision Program (ISP)		<ul style="list-style-type: none"><li>▪ Alternative consequence of violating supervision</li><li>▪ PO SSU supervision</li></ul>
Mental Health	<ul style="list-style-type: none"><li>▪ Probation or Parole</li><li>▪ Mental health and/or</li><li>▪ Intellectual disability needs</li></ul>	<ul style="list-style-type: none"><li>▪ Specialized PO SSU supervision</li><li>▪ Close supervision combined with the participant's treatment program engagement</li></ul>

- Drug and Alcohol-Probation Partnership (DAPP), is an intensive SUD treatment program.
  - The DAPP collaborative team comprises multi-disciplinary representatives, including a Drug and Alcohol Intensive Case Manager (ICM), Probation Officer, and local treatment providers.
  - The team coordinates the supervision and treatment for individuals with non-violent Level 3 or 4 sentences, ‘...for serious (and very serious, respectively) offenders and those with numerous prior convictions...’
  - The drug- or alcohol-dependent participant must agree to a multi-phase treatment program including intensive supervision, frequent court appearances, EM, work-release opportunities, and active participation in treatment.
  - The team stays in contact with program participants, each other, and the individual’s employer and family to help the individual succeed in their recovery program and integrate into the community.
- The Community Service Program is an alternative-sentencing program providing the opportunity for individuals to perform community service work in lieu of, or to reduce terms of incarceration. The individual must complete their CSP obligation before reaching one-half of their probation term; if they have not completed it by then, they are mandated to the CSP.
  - The individual selects a qualifying agency where they can volunteer (typically, a non-profit), performs the work, and provides documentation of the hours worked to their PO. The program benefits the community, provides the individual with work and social experience, and reduces the county's financial impact.
  - Participant treatment programs include life skills groups, Moral Reconation Therapy (MRT), Drug & Alcohol treatment groups, case management groups, GED preparation and testing, adult basic education, and job readiness groups.
- Electronic monitoring (EM) provides the courts with an option to allow individuals to return to the community without incarceration. These units enable their Probation Officer (PO) to monitor their movements and/or alcohol intake at home and in the community. EM device options include:
  - Radio frequency (RF) monitoring, allowing the device to communicate with the home base receiver, typically used when requiring the individual to be home at certain time periods
  - GPS monitoring (active or passive) to monitor their precise geographic locations
  - Alcohol monitoring devices, with or without the RF function, to monitor any alcohol intake
  - EM program participants are assessed for their treatment needs, which informs a treatment plan

### **Data Collection and Sharing**

- The CJAB Case Flow Committee is a robust and productive work group focused on criminal case processing. This committee seems well-suited to address three priorities identified by this workshop group’s participants, including:

Priority 4	Implement the Pretrial Risk Assessment Tool at booking, before preliminary arraignment, to be used by Magisterial District Judges (MDJs) in bail decisions.
Priority 6	Develop diversion at Intercept 2 (e.g., legal representation, connect to services).
Priority 8	Develop a court-based diversion program for people with mental health/serious mental illness (Intercept 3).

## GAPS

### Booking

- Tools and assessments used during booking were unclear. A county staff member will send workshop facilitators the tools used to screen individuals during the jail booking process.
- In some cases, an arrested individual will be brought to the arresting agency's station before being transported to the FCJ. It was not clear what information was given to the FCJ.
- It isn't fully understood what different department policies are when the individual is presenting as a danger to themselves and/or others, intoxicated, or otherwise under the influence.

### Jail Structure and Personnel

- A discussion was held surrounding the perceived discrepancies of FCJ population data.
- There are no designated FCJ housing units for individuals in the MAT program.
- Mental health clinicians at the FCJ are not on-site 24/7.
  - Psychiatry and Nurse Practitioner time is limited to only 4 hours per week.

### Jail Services

- [PeerStar of PA](#) provided mental health peer support services for individuals in the FCJ. It wasn't clear to workshop participants why it had been approximately six (6) months since they had engaged with the FCJ.
- Although case management services are offered to everyone booked into the FCJ, many individuals decline them.
- The TARGET program, modeled using the [Trauma Affect Regulation: Guide for Education and Therapy](#) (TARGET) framework, helped individuals in the FCJ who had a history of trauma cope, primarily through group therapy sessions. TARGET was discontinued due to the COVID-19 pandemic.
- The FCJ is open to having Alcoholics Anonymous (AA) and/or Narcotics Anonymous (NA) hold meetings, but the groups have not found members who could facilitate the meetings.
- The PrimeCare policy and process for bridging medications through pharmacy confirmations is unclear.
- PrimeCare does not use a pharmacy-to-pharmacy program to obtain information about an individual's active prescriptions and history.

## **Competency**

- One of the significant challenges discussed is how the county is serving individuals who may need competency evaluation, and those who have been deemed incompetent.
  - The fear is for individuals who have demonstrated dangerous behavior, and a peer or navigator is not there to help guide them through the behavioral health and criminal-legal systems.
- Another challenge is that there are no competency restoration services currently available other than the state hospital.
  - The wait times for Torrance State Hospital (TSH) placement have varied from a few weeks to a few months.
  - TSH will only accept transfers from jails to their facility for restoration services. Individuals who have been released into the community until services are available are left without treatment and care.
- There are concerns about how competency evaluations are requested and administered, and how quickly they can be obtained.
- The concern is that the county is ill-equipped to handle the individual, including some who are charged with serious offenses, without appropriate resources.
- There is a lack of knowledge among private defense attorneys on the programs and processes available to their clients.

## **Pre-trial Services**

- The courts are challenged in serving people who have experienced Traumatic Brain Injury (TBI) and who may require short- and long-term guardianship.
- Orphans court – has a potential opportunity to utilize and coordinate with guardianship services.

## **Initial Court Hearing**

- Individuals are not provided legal counsel before their preliminary arraignment.
- At the present time, there is no formalized process or standard tool used for pretrial risk assessment, as well as information about any behavioral health conditions. The result is an inability to sufficiently inform the MDJ during the preliminary arraignment, potentially impacting their effectiveness.
- When the court orders assessments through conditions of release, sending a provider out to facilitate the assessment process requires a referral process, which is not currently in place.
- There are inconsistencies in cases when a judge orders an evaluation for individuals in the FCJ.
- There is a need to better inform court personnel about the behavioral health system and its capabilities and processes.
- The bail worksheets used by independent law enforcement agencies are not uniform or standardized.
- Although the PD is knowledgeable about what is needed and how to activate the assessment process, private attorneys are not, which can cause delays or missed opportunities for individuals to get appropriate treatment and care.

- A specialized attorney is available through the Women in Need program, which supports survivors of domestic violence (DV). Although they have some resources to support victims, they have not been able to provide pro bono services to DV victims.
  - There has been an increase in civil protection orders. These orders can be convoluted because many people choose to represent themselves.
- Individuals with landlord-tenant issues are not able to easily access attorneys to help them get trespassing charges reduced.
  - There was discussion about reducing the need for law enforcement and the courts by addressing how civil issues, such as evictions, protection orders, etc., are handled.
- Information sharing between stakeholders before preliminary hearings is not consistent.

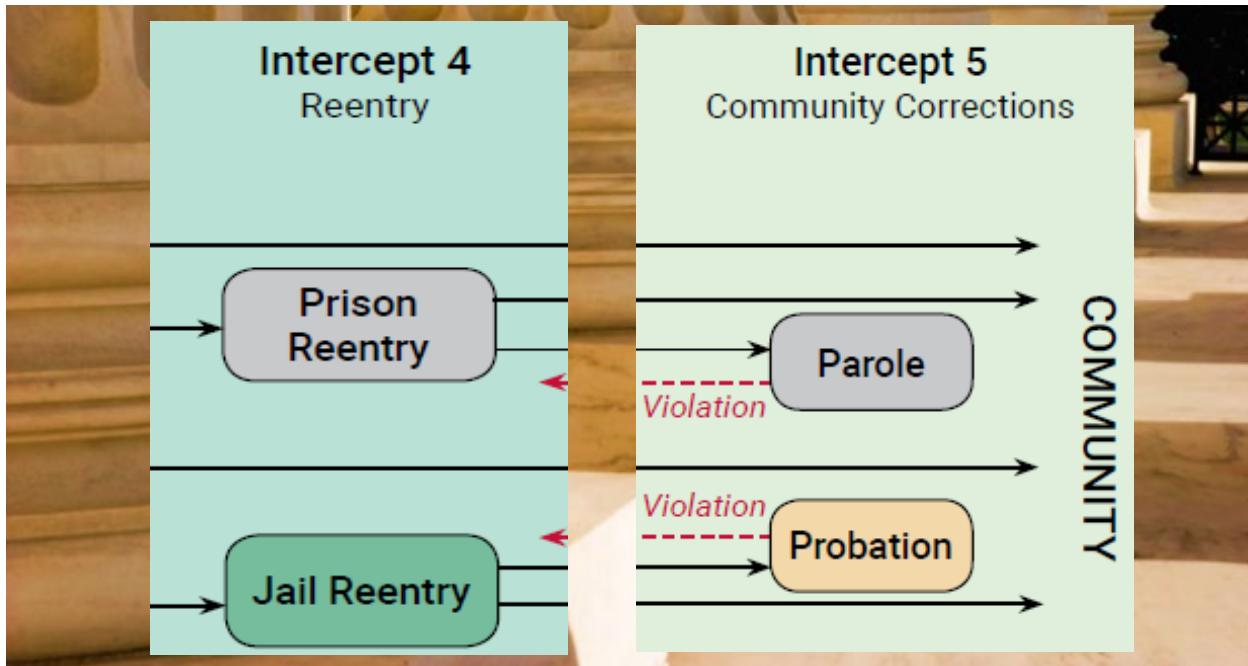

### **Problem-Solving Courts**

- There is a lack of additional problem-solving courts or diversion opportunities at the court level that provide individuals needing treatment and services with a motivating incentive (treatment vs. jail), an opportunity to get the treatment and care they need.
- Much work is being done informally through collaboration and relationship building, but there are limited formal programs or opportunities for potential candidates to pursue.
- It was not well understood why the Get Back Up program was discontinued, or if there is an opportunity to make adjustments to its content and delivery to address any concerns.
  - Traditionally, some screening services were provided before an individual's preliminary hearing. Still, the program Get Back Up ceased in June 2025 due to a lack of funding and the process of the new DA taking over the office.
- There is no official diversionary program for people with mental health challenges.
- The ORAS system is typically used for pretrial assessment, and there are opportunities to understand people at the time of booking better, using more appropriate tools for their intended purpose.
- There are too many low-risk people being held due to the lack of bail, as well as a general impression that not all individuals are being provided equal access.

### **Data Collection and Sharing**

- There are challenges with information sharing across systems, which can create delays and inefficiencies, and missed opportunities for getting people who are ready, the treatment and care they need.
- There is a lack of coordinated information sharing between FCJ and area providers, with one giving the example of arriving at the FCJ to meet with an individual, only to find they had been discharged the day before.

## INTERCEPT 4: REENTRY; AND INTERCEPT 5: COMMUNITY CORRECTIONS

### OPPORTUNITIES

#### Jail Services

- FCJ staff meet with Probation Pre-Release staff to discuss individuals' cases when they are scheduled to be released in the upcoming three (3) weeks. They discuss the individual's program engagement and ensure they have an approved home plan. They also provide specialized reentry planning services for individuals with more complex needs.
- [Celebrate Recovery](#) is an organization that offers group meetings in the FCJ, supported by volunteers, and provides opportunities for individuals to discuss their situations and recovery journeys.
- The Case Assisted Reentry (CARE) program is for individuals in the FCJ with mental health issues. The program can pay for a 30-day supply of medication through a local pharmacy, and there is a contract with Keystone that allows them to obtain an appointment within 10 days.
- MHA Peer Support is invited to attend reentry planning meetings for individuals planning their release and is looking for opportunities to provide additional support.
- The group discussed the importance of keeping local resource guides up to date and available. A suggestion was made to consider using interns to create and publish hard copies and update website information, including leveraging resources from the [Franklin Together Reentry Coalition](#).

- The Franklin County Jail has reviewed high utilizers of social services within the jail and has been using that information to inform re-entry case planning.
- PrimeCare provides a 10-day script for medication that is called into the Keystone Pharmacy and a 14-day script for MAT medication.
- Franklin County offers several programs that may allow the individual to be released from the FCJ earlier than anticipated through a variety of means, including:

**Table 3: Franklin County Reentry Program Opportunities for Early Release**

Program	Eligibility	Program Elements
Community Service Program (CSP)	<ul style="list-style-type: none"> <li>▪ Coordinates company, schedule, work, and reporting</li> </ul>	<ul style="list-style-type: none"> <li>▪ PO supervision and reporting</li> <li>▪ Work at organizations, special projects, or events</li> <li>▪ May be violated for incomplete hours</li> </ul>
Work Release (Pre-Release)	<ul style="list-style-type: none"> <li>▪ Currently employed</li> <li>▪ Willingness to be employed</li> </ul>	<ul style="list-style-type: none"> <li>▪ Court sentencing option</li> <li>▪ Employer screened for participation</li> <li>▪ Unemployed select from the prospective employer list</li> <li>▪ Pre-Release housing unit placement</li> <li>▪ Income processed by Pre-Release unit, court-ordered obligations deducted</li> <li>▪ Assessed by FCJ treatment staff</li> <li>▪ PO supervision</li> </ul>
Electronic Monitoring (EM)	<ul style="list-style-type: none"> <li>▪ Wear SCRAM or other electronic device</li> <li>▪ Respond to inquiries (spot-checks) by PO</li> <li>▪ Adhere to restricted movement orders</li> </ul>	<ul style="list-style-type: none"> <li>▪ Assessment of treatment needs</li> <li>▪ Co-develop treatment plan</li> <li>▪ Attend all treatment programs and activities</li> <li>▪ Jail diversion program</li> <li>▪ PO SSU supervision</li> <li>▪ Restricted movement terms and intense monitoring</li> </ul>

## Community Reentry

- The Franklin Together [Reentry Coalition of Franklin County](#) works to improve the county's reentry programs, processes, and networks. They meet bi-monthly to share information, network with each other's organizations and contacts, and work to connect others into the network.
- The Franklin County [Community Connections](#) offers support to individuals being released from incarceration, individuals who are homeless, at risk of homelessness, and those seeking stable housing.
- Several transportation options are available to Franklin County residents, including:
  - The rabbittransit [Stop Hopper](#) service is an on-demand ride to and from any location within its Chambersburg and Fayetteville-area [service boundaries](#). Rides must be scheduled through a mobile phone application. rabbittransit also offers multiple alternatives detailed on their site.
  - [Leah's Legacy](#) is a D&A program that provides transportation services to individuals needing to attend appointments, hearings, or other activities.

- [Danny's Ride](#) assists individuals with behavioral health needs by connecting them with transportation services through a variety of providers, including Uber, Lyft, rabbittransit, etc. See their [program brochure](#).
- [Pyramid Healthcare](#) offers transportation within a limited area for individuals being admitted or discharged from programs and services, as well as a range of other needs.
- [Noah's House INC., Recovery Homes](#) offers transportation assistance to its residents, as well as a high level of peer support.
- The [Medicaid Early and Periodic Screening, Diagnostic and Treatment \(EPSDT\)](#) benefit is available to individuals up to 21 years old.
- Medicaid is reactivated for individuals reentering the community 30 days before their release date. Once activated, individuals with behavioral health challenges can receive intensive case management services.

## Probation

- At the present time, 2,300 individuals are on a community supervision term between probation and parole.
- Probation is using ORAS to assess anyone on community supervision and is making supervision determinations based on the results.
- PO caseloads include an average caseload per office, including:
  - 150 to 200 cases of low-risk individuals.
  - 40 to 60 cases, medium to high risk, depending on whether the PO is serving a specialized caseload. Specialized caseloads focus trained POs with skills supervising individuals with unique offenses and needs, including:
    - Treatment court participants
    - Sex offenders
    - Participants involving a mental health component
    - Intensive DAPP treatment program participants
    - Case manager from D&A assists as needed
    - Intensive supervision for level 3 and 4 offenders
    - A DUI unit for individuals with DUI/DWI offenses
- Training
  - POs are required to receive CIT training within their first year of employment
  - An 80-hour Basic Training Academy training
  - A 36-hour defensive tactics skills training
  - A 70-hour firearms and practices training
  - Evidence-based practice training, with five (5) core modules, including motivational interviewing, effective interventions, graduated sanctions, case planning, and administering assessments
- For individuals with probation violations, POs try to use the least restrictive means possible to keep the individual in the community as long as possible, with community safety being the highest priority.
  - Any determination to re-incarcerate the individual is primarily based on their potential danger to the community.

- The Probation intake unit is where an individual makes first contact with Probation after their court-ordered release. The unit administers a risk-needs assessment, and based on the results, the individual is assigned the appropriate PO and level of supervision (low risk, medium risk, high risk).
- Specialized POs have received training and certifications in their area of specialty. These typically include areas such as behavioral health, mental health, SUD, DWI, arson, sex offenses, high-risk of violent behavior, and others.
- POs receive training including CIT, Basic Training, defensive tactics, firearms, and evidence-based practice training (i.e., motivational interviewing, effective interventions, graduated sanctions, case planning, assessment).
- The relationship between Keystone and Probation has been building to identify and work with individuals recognized as high utilizers.

## **Parole**

- There are between 400 and 500 individuals on parole in Franklin County, who are also managed by the Probation/Parole department. These include individuals in the Pennsylvania and interstate compact.

# **GAPS**

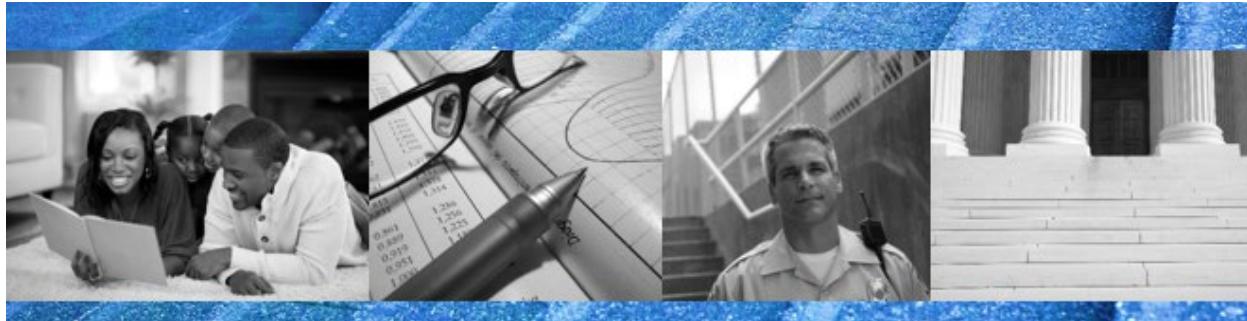

## **Community Reentry**

- There is a need for a Community Corrections Center, providing a one-stop center for individuals being released. This could be an area to explore to address the housing and placement needs for the reentering population.
- The distance between the pharmacy and jail, and from the individual's home to the pharmacy, is making it difficult for individuals to adhere to their medication plan. The prescriptions cannot be transferred to a more convenient pharmacy by the individual.
- Individuals are released from jail with no medication.
- There is a connection, fallout, or lack of coordination when individuals are released from the FCJ. They aren't clear on where to go for treatment, services, or medications.
- There is a lack of available affordable housing resources for individuals who are reentering the community.
- Individuals reentering from the FCJ are having difficulties obtaining transportation between the FCJ, Probation, programs and services, and their homes.
- A rabbittransit mileage reimbursement program is available for individuals with their own vehicles but is not currently funded.

## **Probation**

- The Probation Department reported that staff recruitment and retention problems are the number one barrier to carrying out effective services. At the present time, they are working to fill four (4) positions to fill out their 28-officer roster.

## PRIORITIES FOR CHANGE

The priorities for change are determined through a voting process. Workshop participants are asked to identify a set of priorities, followed by a vote in which each participant casts their vote. The voting took place on September 11<sup>th</sup>, 2025. The top five priorities selected for action planning are in bold text.

Rank	Votes	Priority
1	19	<b>Develop housing resources for the behavioral health justice-involved population and address their health-related social needs (HRSA).</b>
1	19	<b>Develop a mobile crisis team and implementation plan (e.g., culture change). Make mobile crisis mobile.</b>
2	15	<b>Formalize informal processes within and across agencies.</b>
3	11	<b>Embed Peer Supports across intercepts (address recruitment and training).</b>
4	10	<b>Implement the Pretrial Risk Assessment Tool at booking, prior to preliminary arraignment, to be used by Magisterial District Judges (MDJs) in bail decisions.</b>
5	8	Improve communication and awareness of current crisis options and streamline access to available resources 24/7.
6	7	Develop diversion at Intercept 2 (e.g., legal representation, connect to services).
7	6	Improve re-entry, including medications, employment, housing options, etc.
8	5	Develop a court-based diversion program for people with mental health/serious mental illness (Intercept 3).
9	1	Increase engagement, bring services to people (out of the office).
9	1	Maintain housing, employment, and benefits upon incarceration.
10	0	Update the 'Where to Go' resource and develop a dissemination plan for community members and professionals, along with a mechanism to keep it updated.

# ACTION PLANS

**Priority Area #1: Develop housing resources for the behavioral health justice-involved population and address their health-related social needs (HRSA).**

Objective	Action Step	Who	When
Landlord Engagement	<ul style="list-style-type: none"><li>▪ Increase Advertisement<ul style="list-style-type: none"><li>○ Public websites</li><li>○ Reach out to known landlords</li><li>○ Offer incentives<ul style="list-style-type: none"><li>○ Up-front rent for 1 year</li><li>○ Community service hours (work release, inmates clean and repair apartments)</li></ul></li></ul></li></ul>	<ul style="list-style-type: none"><li>▪ Quentin C. (C.C.)</li><li>▪ Melyssa F. (Jail)</li><li>▪ Kayla S. (Probation)</li><li>▪ Stacey B. (CMH/IDD)</li></ul>	Within 3 months
Develop transitional housing with wraparound support, 24-hour staffing, funded by the county, and staffed with criminal justice staff	<ul style="list-style-type: none"><li>▪ Look at space and available property<ul style="list-style-type: none"><li>○ Location of properties</li></ul></li><li>▪ Recruit agencies to do mobile services at the location</li><li>▪ Program guidelines and rules</li></ul>	<ul style="list-style-type: none"><li>▪ Court</li><li>▪ Jail</li><li>▪ Probation</li><li>▪ MH/IDD</li><li>▪ Community Connections</li></ul>	1 to 2 years
Reestablish Local Housing Option Team (LHOT)	<ul style="list-style-type: none"><li>▪ Identify who should be present</li><li>▪ Establish recurring meeting schedule</li></ul>	<ul style="list-style-type: none"><li>▪ Quentin C.</li><li>▪ Stacey B.</li></ul>	Within 3 months

**Group Participants:** Stacey Brookens, Quentin Clapper, Melyssa Flud, Minnie Goshorn, and Steve Todd.

**Priority Area #2: Develop a mobile crisis team and implementation plan (e.g., culture change). Make mobile crisis mobile.**

Objective	Action Step	Who	When
Crisis Regulations (mobile)	<ul style="list-style-type: none"> <li>▪ Waiting for OMHSAS to release for stakeholder review</li> </ul>	<ul style="list-style-type: none"> <li>▪ OMHSAS</li> <li>▪ Stakeholders</li> </ul>	Fall 2025
Funding Court and D&A 9-8-8 Phone units. Commercial Insurance	<ul style="list-style-type: none"> <li>▪ Review current data</li> <li>▪ Review current funding</li> </ul>	<ul style="list-style-type: none"> <li>▪ MH</li> <li>▪ TMCA</li> <li>▪ D&amp;A</li> </ul>	2 months
Reinvestment plan approval	<ul style="list-style-type: none"> <li>▪ TMCA will submit plan to OMHSAS</li> </ul>	<ul style="list-style-type: none"> <li>▪ Missy</li> </ul>	January 2026
Task Force: MH, MCO, PSP, LE, D&A, and Peer.	<ul style="list-style-type: none"> <li>▪ To design mobile crisis program data and software programs</li> </ul>	<ul style="list-style-type: none"> <li>▪ MH</li> <li>▪ TMCA</li> <li>▪ D&amp;A</li> <li>▪ Stakeholders</li> </ul>	3 to 6 months
Make mobile crisis mobile	<ul style="list-style-type: none"> <li>▪ Implement designed mobile crisis program</li> </ul>	<ul style="list-style-type: none"> <li>▪ MH</li> <li>▪ TMCA</li> <li>▪ D&amp;A</li> <li>▪ Provider</li> </ul>	1 year
Marketing of services. Culture change	<ul style="list-style-type: none"> <li>▪ News media, social media, public networking</li> </ul>	<ul style="list-style-type: none"> <li>▪ Provider</li> <li>▪ Task force</li> <li>▪ Community</li> </ul>	1 year and beyond

**Group Participants:** Missy Wileman, Erin Nye, Steven Ross, Ben Sites, Commissioner Dean Horst, and Cori Seilhamer.

### Priority Area #3: Formalize informal processes within and across agencies.

Objective	Action Step	Who	When
Identify Key Stakeholders	▪ Communicate with CJAB Executive Committee	▪ Melodie Hoff, Director Grants ▪ Ronda Ranalli, Grants/CJAB	September 2025 (ST)
	▪ Communicate with full CJAB	▪ Melodie Hoff, Director Grants ▪ Ronda Ranalli, Grants/CJAB	October 2025 (ST)
Identify the informal flows from the key stakeholder representatives	▪ Meet and brainstorm potential flows to formalize within the subcommittees	▪ CJAB subcommittee chairs	October/November 2025
	▪ Present the informal flows identified to the full CJAB	▪ Facilitated by Melodie Hoff and Ronda Ranalli.	December 18, 2025, Holiday CJAB (ST)
Prioritize the ones we want to formalize	▪ The Executive Committee members will review the flows to be formalized	▪ CJAB Executive Committee ▪ Melodie Hoff ▪ Ronda Ranalli	January 2026
	▪ Report out to the full CJAB		February 2026 (LT)
Map / formalize the process	▪ Provide written directives with formalized mapping template to the responsible stakeholders	▪ Executive Committee ▪ Work will continue in subcommittee meetings	March 2026 (LT)
	▪ Subcommittees map processes		Maps completed by October 2026
Distribute formalized maps	▪ End of year CJAB	▪ CJAB Committee chairs will distribute finalized maps	December 2026 (LT)

**Group Participants:** Carrie Gray, Genevieve Harper, Melodie Hoff, Stacie Horvath, President Judge Meyers, Ronda Ranalli, and Angela Stoner.

#### Key

ST = Short-term

LT = Long-term

#### Priority Area #4: Embed Peer Supports across intercepts (address recruitment and training).

Objective	Action Step	Who	When
Provide information	<ul style="list-style-type: none"> <li>▪ Benefits of peer support to their agencies</li> </ul>	<ul style="list-style-type: none"> <li>▪ Joey, SCA</li> <li>▪ Mike K., SCA</li> <li>▪ County Mental Health</li> <li>▪ Denita</li> </ul>	6 months
Assessment to be completed about where Peer Support could fill in gaps in the Intercepts	<ul style="list-style-type: none"> <li>▪ Speaking to those agencies about how Peer Support is currently being used, as well as potential use</li> <li>▪ Collect data from the priority population</li> </ul>	<ul style="list-style-type: none"> <li>▪ SCA</li> <li>▪ TMCA</li> <li>▪ MH/IDD</li> </ul>	3 to 6 months

**Group Participants:** Joey Bailey, James Eagler, Denita Mohney, John Thierwechter, Douglas Wilburne

**Priority Area #5: Implement the Pretrial Risk Assessment Tool at booking, prior to preliminary arraignment, to be used by Magisterial District Judges (MDJs) in bail decisions.**

Objective	Action Step	Who	When
Identify an evidence-based practice assessment  Buy-in from stakeholders	▪ Look at what the county currently has as well as other jurisdictions	▪ Heather Franzoni ▪ Douglas Wilburne ▪ Casey Bogner	2 months
	▪ Training and education of stakeholders	▪ Case Flow Committee.	3 months
	▪ Cost-benefit analysis and data from other jurisdictions		
Develop procedures to administer Secure necessary funds	▪ Create a workgroup	▪ MDJ ▪ Jail ▪ APO ▪ DA ▪ PD ▪ Common Pleas Court ▪ Conflict Counsel ▪ Court Administrator ▪ County ▪ Grants	4 to 6 months
Implementation	▪ Continue educating stakeholders ▪ Identify and train staff ▪ Identify service providers	The workgroup from above.	12 months
Quality Assurance	▪ What data are we looking for? ▪ Collect data	▪ Different people across jurisdictions. ▪ Heather Franzoni ▪ Douglas Wilburne ▪ Casey Bogner	Ongoing

**Group Participants:** Casey Bogner, Aimee Hutchison, Janet Juarez, Judge Angela Krom, John Lloyd, Angie Mackley, Kevin Taccino, and Michelle Weller.

## PARKING LOT

**S**ome gaps identified during the Sequential Intercept Mapping are too large or in-depth to address during the workshop. These issues are listed below.

- There are limited resources and funding options for individuals with Traumatic and Acquired Brain Injury.
- There is an interest in conducting Juvenile-focused SIM mapping.

## RECOMMENDATIONS

### 1. Develop a Crisis Continuum of Care to provide effective, timely alternatives to law enforcement responses to calls for service.

Responding effectively to calls for service related to crisis or behavioral health issues will require a variety of services, as a one-size-fits-all approach (such as opening a single crisis care facility) rarely adequately meets the community's needs. Data and guidance from peers should be brought together to explore innovative additions to the crisis care continuum of services, which could include a variation of the following models:

- Mobile crisis teams untethered from law enforcement, often including composed of behavioral health staff, peers, paramedics, and/or fire department staff, for example:
  - Atlanta's [Policing Alternatives & Diversion Initiatives](#) 311 Community Referrals program is one outcome of their 9-1-1 analysis, which should be explored as a potential solution to addressing a shift in the way calls for service are handled by non-law enforcement entities.
  - Community paramedic programs.
  - [CAHOOTS](#) (Eugene, OR), [STAR](#) (Denver, CO), and [Community Response Team](#) (Colorado Springs, CO). The [Crisis Response Unit](#) (Olympia, WA) includes peer navigators on its response team.
- Peer respite programs, such as the [Promise Resource Network's Retreat @ The Plaza](#), are among others listed in [this directory](#).

Additional strategies to expand the crisis continuum of care may include:

- Expand CIT Training and coordinate across each of the police entities in the surrounding municipalities
- Provide Mental Health First Aid training to all uniformed officers who do not receive CIT training
- Expand crisis care treatment interventions, and consider developing a Mobile Crisis Team

To be effective, mobile crisis teams must be adequately staffed to respond promptly to crisis calls. More communities are coordinating mobile crisis team responses with law enforcement, especially during peak call hours and co-locating services or embedding clinicians in police district headquarters. Often, these services are augmented by providing telephone or videoconference consultation to law enforcement. Over the past few years, the Substance Abuse and Mental Health Services Administration (SAMHSA) and many states have begun to identify a '[Continuum of Care for Crisis](#)

Services.' In addition, states such as Texas, New York, Virginia, and California have state-funded initiatives to enhance crisis services in their communities.

CIT International has released the [Crisis Intervention Team \(CIT\) Programs: A Best Practice Guide for Transforming Community Responses to Mental Health Crises](#), the first comprehensive guide for communities to best practices for starting and sustaining CIT programs.

Also, develop and enhance officer wellness strategies. Below are two officer safety and wellness initiatives with a variety of resources.

- [Destination Zero](#)
- [Valor Officer Safety and Wellness Program](#)

**2. Develop more formal and coordinated screening and diversion strategies for arraignment diversion (Intercept 2) and pre-plea diversion (Intercept 3).**

A lack of resources, collaboration, and training for assigned counsel, the judiciary, and prosecutors hampers early diversion opportunities in rural communities. Training for judges, attorneys, and court staff is critical to the success of these programs. Increasing understanding of mental illness and how various tools measure pretrial risk (as opposed to risk of violence) facilitates informed decision-making by court-based professionals.

Formalizing screening protocols at arraignment and at the jail is the first step in expanding and implementing diversion strategies. Many screens, such as the [Brief Jail Mental Health Screen \(BJMHS\)](#), are in the public domain. The use of this effective, quick, simple, and free resource is a powerful booking tool for screening incoming detainees in jails and detention centers to determine the need for further mental health assessment. The BJMHS assesses incoming detainees for the possibility of having a serious mental illness such as schizophrenia, bipolar disorder, or major depression. The process takes less than three minutes and can be easily incorporated into corrections officers' booking process. The entire screen consists of eight yes/no questions. The information gathered from this tool could be shared with the person as they move through Intercepts 2/3, providing valuable insights to support decision-making and identify diversion opportunities.

Additional brief mental health screens include the:

- [Correctional Mental Health Screen](#)
- [Mental Health Screening Form III](#)

Brief alcohol and drug screens include the:

- [Texas Christian University Drug Screen V](#)
- [Simple Screening Instrument for Substance Abuse](#)
- [Alcohol, Smoking, and Substance Involvement Screening Test](#)

Defendants with mental health disorders who are remanded to pretrial detention often have worse public safety outcomes than defendants who are released to the community pending disposition of their criminal cases. Consider proportional responses based on the severity of a defendant's criminal risk and behavioral health treatment needs. The [risk-need-responsivity](#) (RNR) model has been widely regarded as the premier model for guiding assessment and treatment. According to Andrews and Bonta's RNR theory, the best outcomes are achieved when (1) the intensity of justice supervision is matched to an individual's risk for recidivism (criminogenic risk) or likelihood of failure in treatment (prognostic risk), and (2) treatment focuses on the specific disorders or conditions that are responsible

for criminal behavior (criminogenic needs). Researchers have found that providing the wrong kinds of services can worsen outcomes by wasting resources and imposing excessive burdens on people that interfere with productive activities (Lowenkamp & Latessa, 2004). In addition, placing people in the wrong treatment can potentially increase crime and other undesirable outcomes (Lloyd, Hanby, & Serin, 2014; McCord, 2003; Welsh & Rocque, 2014). See AllRise's [ARK model](#) for more details.

- Defendants with pending cases who are released to pre-trial services as an alternative to detention. These may be cases with moderate criminal risk, but where the individuals would benefit from community-based services that are not available while in pretrial detention, and pretrial failure can be avoided.
- A deferred prosecution approach where a low-risk defendant is directed to participate in a short-term community-based treatment program. Successful completion of the program results in dismissal of the charges, while failure results in remand to custody and continuation of the criminal case.
- The [RNR Simulation Tool](#) is a web-based decision-support system to help jurisdictions and providers implement the RNR framework. This approach integrates the science around effective screening, assessment, programs, and treatment matching (responsivity) to improve individual and system outcomes. To that end, the [RNR Simulation Tool](#) has three portals: 1) The RNR Program Tool for Adults; 2) Assess an Individual; and 3) Assess Jurisdiction's Capacity. This document provides users with general information about each portal and its intended uses.
- The [AllRise ARK](#) combines RNR theory and the SIM model. Each quadrant in the ARK matrix represents a specific risk and need profile for individuals at a specific stage in the criminal legal system. Each quadrant is associated with evidence-based and promising programs that match that profile and stage. For example, you can view evidence-based and promising programs for a high-risk, high-need individual on probation, or for a low-risk, low-need individual on pretrial supervision.
- Consider a competency court docket, such as was established by the Seattle Municipal Court, to reduce time spent in jail during the competency process. Refer to the [journal article](#) by Finkle and colleagues (2009) and the [2013 report](#) on the Seattle Municipal Court Mental Health Court, which houses the competency court docket.

Essential elements of Intercept 2 diversion can be found in the SAMHSA Monograph, '[Municipal Courts: An Effective Tool for Diverting People with Mental and Substance Use Disorders in the Criminal Justice System](#).' The monograph identifies four essential elements of arraignment diversion programs. Improving screening, clinical assessment, and behavioral health disorders for those who are released without referral or follow-up. The [CASES Transitional Case Management](#) and the [Manhattan Arraignment Diversion Program](#) are two examples.

See also the [Screening and Assessment](#) section of the Resources below.

**3. Target strategies/interventions to address the arrest, incarceration, and re-arrest cycles of homeless individuals and other individuals who return to the health care and/or criminal legal system repeatedly.**

Although most jail admissions represent the only contact a person will have with the criminal legal system, a small group experiences more frequent jail contact and accounts for a disproportionate share of both admissions and expenditures, a gap identified at the SIM workshop. People with

frequent jail contact experience complex, interconnected social, economic, and behavioral health needs that may exacerbate (or be exacerbated by) their frequent jail contact. This group also frequently contacts other community services, such as emergency rooms, homeless shelters, and treatment facilities. Strategies to implement services that meet complex needs and address structural barriers are critical to reduce system involvement meaningfully and sustainably among the population of people who experience frequent jail contact.

In general, there are four categories of criteria used to identify people with frequent jail contact: 1) the specific type of jail and other criminal legal system contacts counted; 2) the number of contacts considered frequent; 3) the window of time in which repeat contact occurs; and 4) inclusion of contact with other systems such as homeless servicers, ER/hospital care, and first response. The Center for Supportive Housing FUSE Resource Center describes [supportive housing initiatives](#) for people who have frequent contact with jails, hospitals, health care, emergency shelters, or other public systems.

Communities across the country have developed strategies to concentrate resources on this population. Strategies involve developing a coordinating committee composed of mid-level managers of provider agencies, direct service individuals, and criminal justice personnel who can identify and mobilize resources to engage individuals in a timely way and at periods of high need (e.g., an ER visit, police contact, or arrest). Often, the individuals identified with frequent jail or service contact have priority for intensive services, including Assertive Community Treatment (ACT), case management, and housing. These initiatives commonly report reductions in ER use, inpatient stays, police contacts, and homelessness.

Once a coordinating team has been established and definitions of people with frequent jail contact have been identified, it is important to examine, update, and analyze to document the costs associated with not meeting the accurate needs of this population to the entire system of care. Communities can use this information to justify and substantiate local funding needs for the crisis system of care. Sites might consider a ‘crisis care safety tax’ to help underwrite the staffing and development needs for mobile co-responder crisis services in the community.

The following is a one-step approach to implementing a Familiar Face strategy in your community.

- Convene a cross-system data group to determine what questions you are trying to answer.
- Identify and define terms.
- Use existing data from a specific period of time (six months to three years) from non-HIPAA-covered sources, such as 9-1-1 and court data, to identify people known to emergencies and court services. Narrow the list to the top 50 to 200 individuals (depending on the size of your jurisdiction) and form cohorts in increments based on the level of contact. This list (name, DOB, gender identity) can be shared with HIPAA-covered and non-covered entities.
  - According to the agency HIPAA status or the data sharing agreement, the receiving entities can report the percentage of known individuals per cohort rather than whether the actual person is known to the entity.
- Average costs for services and contacts can be provided and used to determine the average costs per individual, per year.
- Cross-system information can be compiled and analyzed for review and action.

[Camden, New Jersey](#), has developed a promising collaboration among health care, social service, and law enforcement to address its “complex care” populations, which have frequent contact with hospitals and sometimes police. They have been showing success in reducing repeated contact and improving health.
